

# When you install a Karran sink, you're free to worry about other things...at least for the next fifty years!

*Before you spend good money for a sink, think about the abuse you're about to dish out; penetrating grease, staining foods, abrasive cleansers, ceramic dishes, metal utensils, hot pots and pans, and thousands of gallons of flowing water, enough to wear down a rock. The sink that looks great in the showroom may not be so lovely after a couple years of that kind of torture. What you need isn't a sink exactly, it's a super-sink. Fortunately, there's Karran.*

## The world's greatest sink was invented by a chemist.

Before Karran was a sink, it was a polymer of exceptionally high molecular weight or atomic mass. For those without a Ph.D. in chemistry, that means Karran is structurally pre-disposed to resist staining, heat and impact—a sink's major foes. The chemical geniuses who developed Karran, did so specifically for kitchen sinks. It just plain resists, well, everything. And you'll only find Karran in a Karran Sink.

## We're still looking for something to stain it.

We tested Karran successfully against a hideous array of sink destroyers. But a British housekeeping magazine didn't take our word for it. They set out to prove Karran vulnerable, throwing everything except the kitchen sink in our kitchen sink: citric acid, red wine, mustard, ketchup, berries, mercurochrome, coffee, tea, ammonia, silver dip, vinegar.

The destructive blighters even dumped in a bit of black hair dye. But they never found anything that would permanently stain a Karran Sink. In fact, no one has.

## Pots. Utensils. Detergents. Even micro-organisms bounce off.

Drop your heaviest pots into the Karran sink. No dents. Scour with Comet®. No scratches. Go ahead, use a metal scouring pad, if you like. It's unnecessary because Karran cleans up with the mildest

detergent. But if you really must assault your Karran sink, feel free. Karran doesn't mind. That's because it's pure Karran through and through, backed up with fiberglass for incredible impact strength. Temperatures as high as 365° F won't faze Karran either. And because Karran is so impervious to moisture, it will be sure to disappoint micro-organisms and bacteria, who have no chance to settle in.

## The only thing Karran absorbs is noise.

While you're banging pots and pans on your Karran sink, you might notice you can still hear yourself saying "Wow, that's incredible" under your breath. You see, despite Karran's incredible imperviousness to everything else, it actually absorbs noise. The chemists didn't plan this, it's just a nice bonus.

## Oh yes, it's beautiful, too.

Maybe the biggest mystery surrounding the Karran sink is how anything so tough can look so good. You'll notice the kind of soft glow you only see in solid surface sinks (so much nicer than stainless steel). You'll certainly find a model to suit you, whether your kitchen is contemporary or traditional, or whether you need a special sink for a laundry or bar. The only question is which of Karran's 14 styles to choose.

## A 50-year warranty seems too short.

We don't believe a half century of use will sink your Karran sink, but don't take our word for it. Take our iron clad, no... make that Karran clad warranty instead. Your Karran sink will be free of material and manufacturing defects for a period of 50 years, or the manufacturer will replace it free.

**PLEASE NOTE:** Karran sinks can be installed on or under a variety countertop materials. All sinks are available in the following two colors:

Please see sample product for true color.

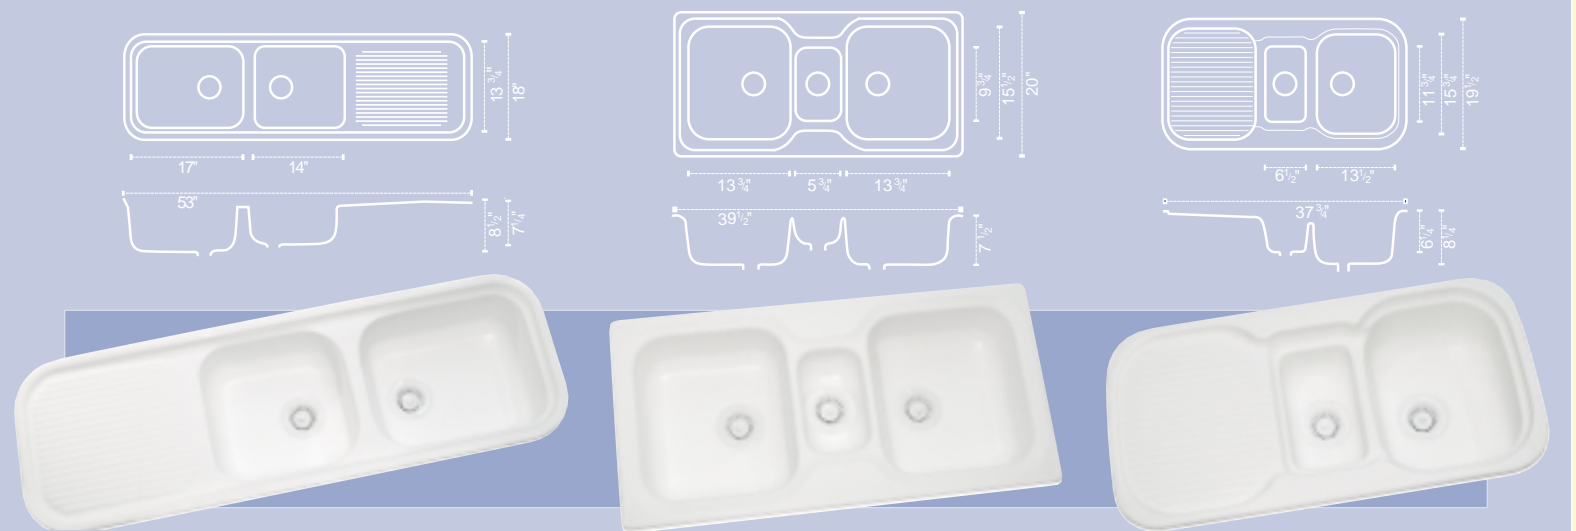

All sinks comply with ANSI Z124.6-1997 (IAPMO)  
Karran USA • 1422 E. Elkhorn Rd. • P.O. Box 667 • Vincennes, IN 47591  
Toll Free: 866-452-7726 • Fax: (812) 885-2440

**Karran** SELF-RIMMING SINKS. STRENGTH, BEAUTY, AND DURABILITY YOU CAN DEPEND ON FOR DECADES.

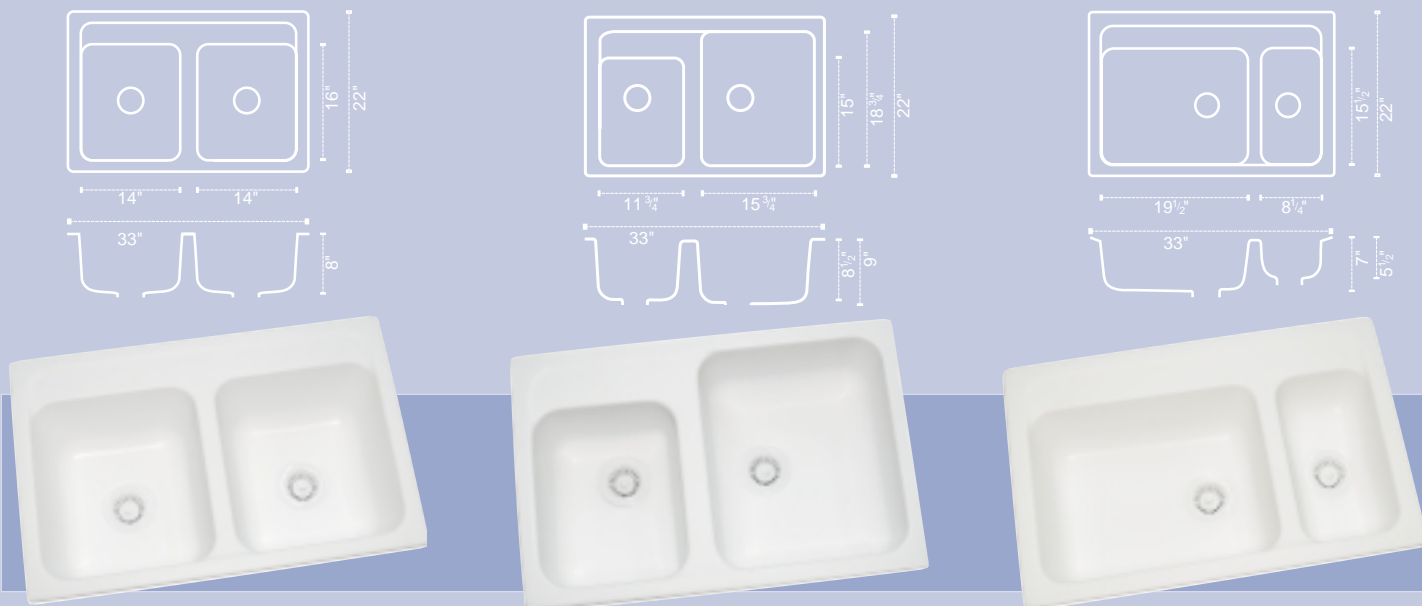

- Easy to clean.
- Guaranteed never to stain...EVER.
- 50-Year Warranty.
